MPS49
3 Channel Versatile Air Data Test Set

- Testing for AoA, Ps and Pt
- RVSM compliant - up to 18 months
- 5000 hour pump warranty
- 2 hour battery back-up
- 12 port multiple line switching
MPS49 3 Channel Versatile Air Data Test Set

SUPPLYING AIR DATA TEST SETS TO THE WORLD
From the 1938 origins DMA have supplied test equipment to meet the requirements of the aviation industry. Today the DMA product range covers precision Air Data Test Sets and other aerospace related equipment to users including Manufacturers, Airline and Business Jet operators, General Aviation and Repair Stations throughout the world.

FLIGHT LINE TESTER FOR DEMANDING APPLICATIONS
The MPS49 is a 3 channel, Ps altitude, Pt airspeed and Angle of Attack (AoA) digital technology portable flightline air data test set. The construction is both rugged and rainproof and housed in a well proven HDPE case that incorporates both wheels and a retractable tow handle making transportation in the working environment simple. The associated auxiliaries of power leads and hoses are contained in an accompanying shoulder bag.

AUTOMATIC CONTROL OF 3 INDEPENDENT PRESSURES
Three pressures are controllable separately and independently: Static and Pitot for altitude and airspeed together with Angle of Attack (AoA) pressure to test those aircraft equipped with the Smart pitot probe.

The angle of attack pressure can be displayed either in pressure units with a maximum of 0.0001 inHg resolution. When three pressures are not required, AoA ports can be used as further Static ports.

USER INTERFACE
A conventional keypad is augmented by a multi-colored touchscreen display for the operator to enter the test details. For flight deck use the MPSRC remote control or MPSRW wireless remote control are available. All the important air data functions are simultaneously displayed on either local or remote displays and constant screen or menu changes are not required. Readings of both commanded and measured, actual, values are displayed.

EXCLUSIVE 5000 HOUR PUMP LIFE WARRANTY
The MPS49 is a rugged flight line instrument designed for low maintenance. The low maintenance internal pressure and vacuum pumps run only on demand, extending the pump life and carrying a 5000 hours industry exclusive warranty (see specification for details), based on test set running hours.

AUTOMATED CALIBRATION
Calibration is fast and simple since no mechanical adjustments are required. Calibration factors are password protected for security. The resultant accuracy of the sensors exceeds the RVSM industry requirements. The DMA Transfer Standard PAMB11H, under the recommended operating conditions, can be utilized for the MPS49 calibrations.

FLEXIBLE MULTIPLE LINE SWITCHING OPTION
The MPS49 standard 3 connectors, for altitude, airspeed and angle of attack, can optionally be changed to independently addressable configured ports to control up to 4 lines for Ps altitude, 4 lines for Pt airspeed and 4 lines for angle of attack. This enables rapid leak detection of problematic multi-point systems all via the operator interface by isolating ports until the leaking line is found.

Additionally the Multiple Isolator gives the ability to establish different parameter values in the lines by selected isolation. This feature can then introduce the desired different values to enable, for example, the altimeter comparator test. At the completion of the test the MPS49 automatically balances all the port values and brings the total system safely to ambient.

LOW POWER CONSUMPTION FOR HIGH RELIABILITY
Careful consideration during the design phase ensures low power consumption giving minimal internal temperature rise resulting in high reliability: typically 65W power consumption from the a.c. line.

INTERNAL BATTERY FOR SAFETY AND VERSATILITY
The MPS49 is equipped as standard with an internal rechargeable battery that provides an emergency power supply that gives up to two hours full operation should AC supply fail or be unavailable, such as for remote use. For those occasions when the AC power fails during a test the battery will seamlessly replace the AC supply permitting the test to continue or for the safe shut-down under total control. The battery is flight approved for transportation purposes and can be accessed and replaced from the front panel of the instrument. Operation without a battery is also possible.

BUILT IN SAFETY LIMITS FOR UUT PROTECTION
The MPS49 is designed for maximum safety during testing. Key DMA design features protect both the test set and the systems under test. Negative Qc, a pressure condition of Ps greater than Pt, is prevented in both manual and automatic operation. In the unlikely situation where both a.c. and internal battery operation is not possible the Unit Under Test (UUT) is safely isolated and can be manually vented preventing instrument and test set damage.

 numerous preset factory or user programmed safe limits are provided to prevent damage to the UUT. These limits can be modified by the user either temporarily or permanently, with password protection if desired.
Optional MPSRE2 Multi-colored backlit 7" LCD touch screen hand terminal

Optional multiple line switching, Up to 4 lines each for static, pitot and AoA

Universal power input with 28 VDC Option

Internal 2 hour battery for safety and versatility (removable)

Low power consumption for high accuracy and reliability

Vacuum supply for static adapters

Optional ARINC 429, IEEE 488, Ethernet and Altitude encoder interfaces

Rugged splash proof case with wheels, stowable handle and removable lid

Color touch screen display

Local control keypad

Terminal connector

3 Channels of independent pressure control for Static, Pitot and AoA

A wide range of pitot-static adapters and adapter kits are available from DMA

MPSRC hand held remote control unit, included as standard: Multi-colored backlit 3.5" LCD touch screen and keypad
DMA-Aero

MPS49 Standard Specifications

Ongoing development results in specifications being subject to change without notice

STANDARD TEST FUNCTIONS

- Automatic leak check
- Controlled venting to ambient
- Altitude/airspeed input
- Static/total/dynamic(Qc) pressure input
- Pressure/angle of attack input
- Mach Number input
- EPR generation
- TAS/IAS toggle, TAS temperature correction
- Altitude offset correction
- 30 user test programmed profiles of 26 steps each
- Ultra low speed (2 to 200 kts) for improved accuracy and stability
- USB port for USB memory device to store results and download test programs
- Audible indication approaching set point
- Vacuum port on front panel

DISPLAY AND KEYPAD

Integral display and keypad in splash proof and shock protected front panel. Multi-colored backlit LCD touch screen, 4.3” diagonal, displays all test parameters.

DISPLAYED UNITS

Altitude: ft, m
Airspeed: kts, km/h, mph
Pressure: inHg, hPa, kPa, Pa, psi, mmHg, inH2O 4°C

CALIBRATION

12 months, contact factory for extended recalibration period up to 18 months.

PHYSICAL SPECIFICATIONS

Weight: 33 lbs. (15 kg.)
MPSRC: 1.1 lbs (0.48 kgs)
Dimensions: L 22 x W 14 x H 9 in. (L 558 x W 356 x H 230 mm)

Connections: Ps: AN-6, Pt: AN-4, AoA: AN-3
AN 37° flare fittings with o-rings allow finger tight connections

ENVIRONMENTAL

Temperature range
Operating: -5°C to +50°C
Storage: -20°C to +70°C
Extended range available on request

POWERS SUPPLY

Universal: 90-240 VAC, 50-400 Hz, 65 W
2 hours operation internal rechargeable and removable battery

WARRANTY

Unit: 2 Years
Pumps: 5000 running hours or 4 years, whichever expires first

Options

- A0 28 VDC Power supply: (18 to 30 VDC)
- A2 Without battery
- B3 Ethernet interface
- B4 IEEE-488 GPIB interface
- B5 ARINC429 monitoring interface
- B7 Gray code altitude device read-out
- B8 Bluetooth interface
- B9 Wi-Fi interface
- E Up to 4 + 4 + 4 multiple isolators (refer to DMA for option variations)
- F4 ADWIN PC Control software (unlocked)
- J2 1000 kts range
- Custom Pitot/Static connections available

Included Accessories

- MPSRC Remote control unit - 3.5” LCD
- ADWIN PC Control software (locked to MPS45/49)
- USB cable & USB memory device
- Power Plug to be chosen from: USA PLUG, EU PLUG, UK PLUG, SWISS PLUG, AUSTRALIA PLUG
- Hoses and fittings

Optional Accessories

- MPSRW Wireless remote control - 7” LCD
- MPSRE2 Remote control unit - 7” LCD
- Other communication cables

Associated products

- Pitot-static adapters
- PACM11H Pressure indicator/transfer standard

Notes:
1. Control capability on all load volumes: Static: 0 to 125 cu. in. (2 L), Pitot: 0 to 80 cu. in. (1.3 L). Larger volumes acceptable
2. ULS is enabled by pressing SHIFT + 6
3. High rate achievable into small system volumes
4. Total accuracy includes all metrological uncertainty contributions for the pressure measured. Metrological data has full traceability to NIST.
